Integrated Whole House Cleaning

Selecting the right central vacuum system for your home is easy.

If you're like most homebuyers looking for a way to create a cleaner, healthier home with added convenience and value, Platinum Force™ has the solution.

The Dirt Devil® Platinum Force™ Bagless central vacuum system offers convenient whole-house cleaning performance. With Platinum Force™ there is no recirculation of dirt and dust into your home. Your house smells fresher and cleaner because it is fresher and cleaner. Platinum Force™ combines cyclonic cleaning action with high-performance filtration for maximum cleaning power.

You always have peak cleaning efficiency and consistent vacuum power with the Dirt Devil® Platinum Force™ Central Vac System. Upholstery, carpets and all your furnishings are cleaned more deeply with less wear.

TURBOCAT®

has a low-profile making it easy to maneuver around and under furniture.

THE RUGRAT®

hand-held powerbrush provides turbine-powered cleaning for stairs, upholstery and other tight areas.

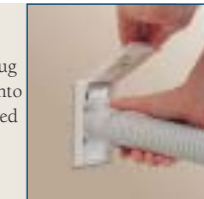

VACPAN™

gives you clean-up convenience in bathrooms, mudrooms, kitchens and laundry areas.

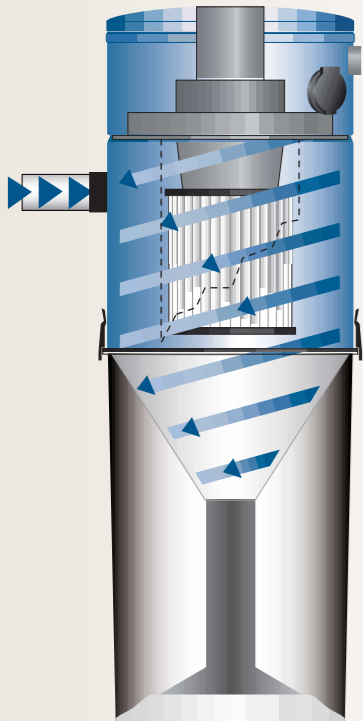

INLET VALVE

To vacuum, simply plug the lightweight hose into the conveniently located inlet valves.

THE Filtered Cyclonic Difference

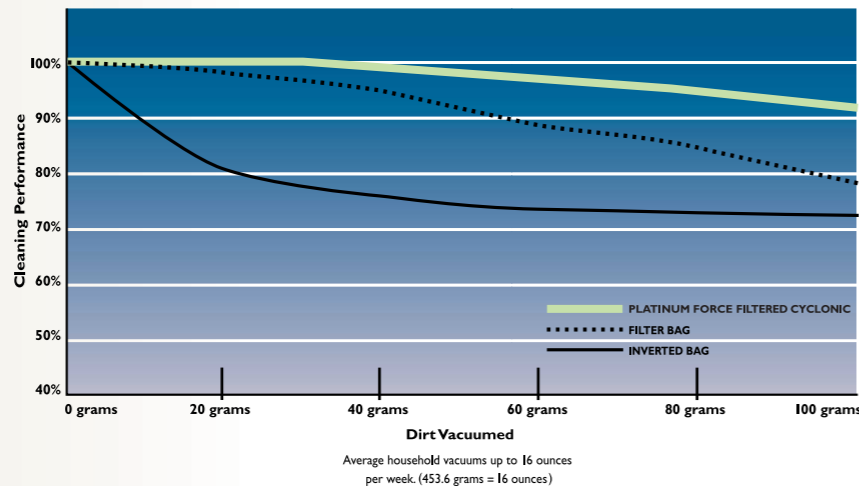

Dirt Devil® Platinum Force™ Bagless Cyclonic Systems are able to maintain and sustain maximum cleaning power over time. After just one use of a “bagged” vacuum system, a measurable decrease in suction power and airflow occurs as dirt and dust begin to accumulate.

The Dirt Devil® Platinum Force™ Bagless Cyclonic whole-house vacuum system is designed to maintain maximum airflow and optimum cleaning performance to help keep your home clean and fresh. The combination of cyclonic action and high-performance filtration keeps your system operating at peak performance.

As dirt and debris are vacuumed into the system, the cyclonic cleaning action separates it from the airstream as it travels around the cyclonic assembly. Dirt and dust drop through the cyclonic cone and are deposited into the dirt bucket. The fine, lightweight dust particles are trapped in the pleated filter as the air is exhausted from the system. The high-performance filter allows for maximum airflow and captures particles as small as five microns.

The Dirt Devil® Platinum Force™ bagless system maintains peak cleaning efficiency with consistent vacuum power and airflow. Carpets and furnishings are cleaned more thoroughly with less wear.

PLATINUM FORCE™ MAINTAINS MAXIMUM SUSTAINED CLEANING POWER

It takes just one day to install a Dirt Devil® Platinum Force™ Central Vacuum System in your home.

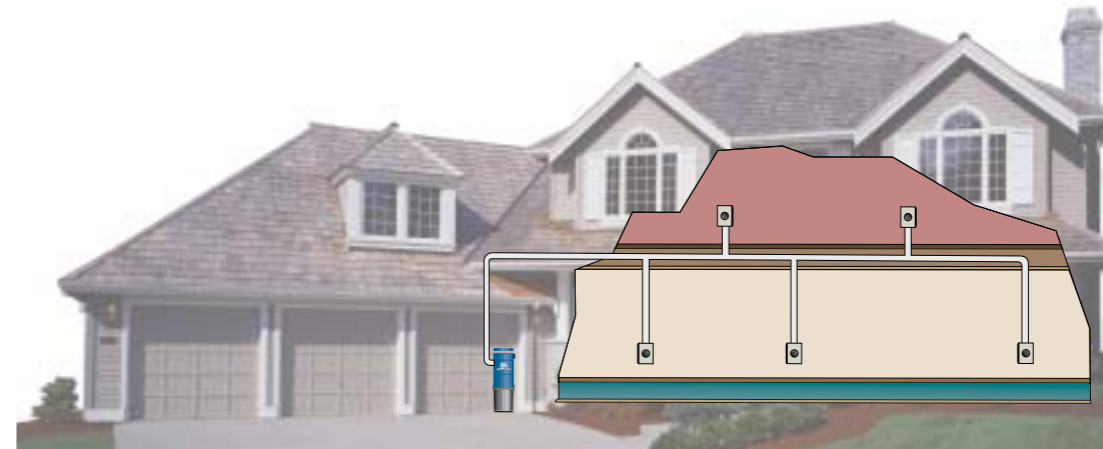

That's one of the many excellent reasons to make Platinum Force™ the smartest, easiest choice for integrated whole house cleaning.

Platinum Force's™ powerful central vac performance and cleaning versatility are designed for today's homes and furnishings. With a wide array of accessories and powerheads, the Dirt Devil® Platinum Force™ system can clean all your interior surfaces.

The Dirt Devil® Platinum Force™ System works by transporting dirt, debris and dust particles through a simple network of tubing that runs through the walls to the power unit. The in-wall tubing is easily installed during construction or added to an existing home. Installation is usually completed in less than one day with no structural modifications needed.

To ensure the quietest home environment, the power unit is located away from the living area, typically in a basement, garage or utility room. Inlet valves are placed in strategic locations for maximum cleaning convenience and whole-house coverage. The Dirt Devil® Platinum Force™ Central Vac System even has an inlet valve located on the power unit for easy clean-ups in garages, workshops and basements.

You're just a day away from cleaner, healthier living.

The system can be installed in new or existing homes in about a day. The power unit can be located in basements, crawl spaces or garages.
